

Hostel Water Station

Pure Water, Healthier Tomorrow

Available Models

100 L, 200 L & 250 L Capacity Options

Raj Innotech offers three capacity variants to match the exact needs of your hostel or institution. Each model is built with a stainless steel body, multi-stage iron removal, and ultra filtration — delivering safe, clean drinking water for students and staff every day.

100 L Model

100 Litres / Hour

Iron Removal + Ultra Filtration

Suitable for 50 Students

200 L Model

200 Litres / Hour

Normal + Chilled Water

20L Jar Refill

Suitable for 100 Students

250 L Model

250 Litres / Hour

Iron Removal + Ultra Filtration

20L Jar Refill

Higher Student Strength

Key Features

Easy daily use for students and staff

1

Normal Water

Clean purified water on demand

2

Chilled Water

Cooled water for hot days

3

20L Jar Refill Facility

Refill standard 20-litre jars easily

4

Multiple Tap Access

Several taps for simultaneous use

5

Iron Removed + Ultra Filtration

Removes iron, particles & bacteria

6

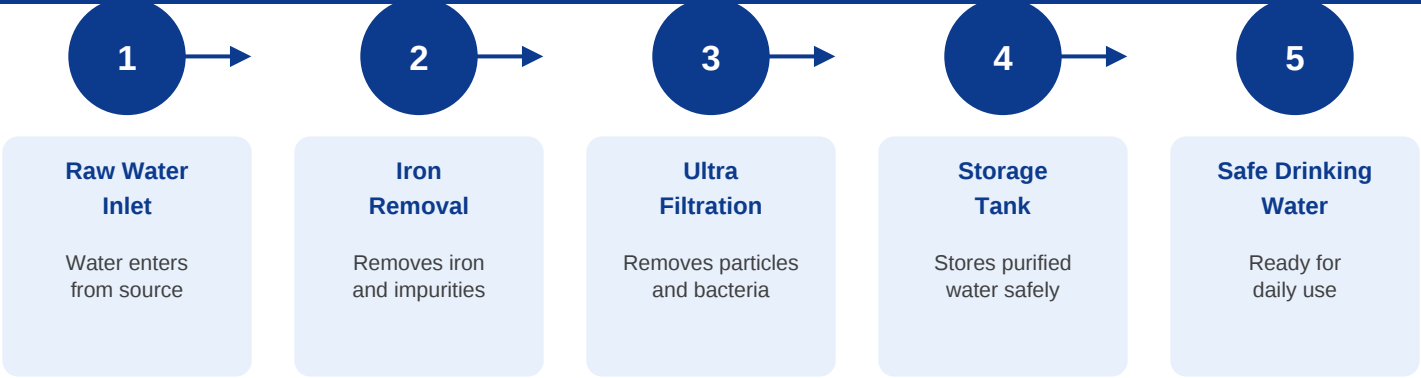

Stainless Steel Body

Durable, hygienic and easy to clean

"Pure, safe and convenient drinking water — every day"

Water Treatment Process

Simple and effective purification system

How It Works

Raw water enters the system and passes through an iron removal stage that strips dissolved iron and heavy particles. It is then ultra-filtered to remove bacteria and fine sediments, stored in a hygienic stainless steel tank, and delivered through multiple taps — giving students clean, safe water all day.

3	SS	Multi	Daily
Filtration Stages	Stainless Steel Body	Tap Outlets	Maintenance-Free

Key Benefits

- Reduces iron content
- Improves clarity
- Better taste
- Safe for daily drinking

Effective multi-stage water purification technology
